MONEY, STOCKS AND GRAIN

Several Pieces of News Caused Improvement in Wall-Street Business.

Bankers Will Take Out All the Clearing-House Certificates Necessary to Avoid Trouble-Indianapolis Cereals Dull.

THE BOND MARKET.

Railway Issues Closed Firmer on Sales of \$392,000. At New York yesterday money on call was active, ranging from 6 to 50 per cent.,

the last loan being made at 25. Prime mercantile paper, 6@8 per cent. Sterling exchange was weak, with actual business in bankers' bills at \$1.801/2 @ 4.81 for sixty days and \$4.824@4.83 for de-

mand. Silver certificates were in better request, with sales at from 67c to 69c, closing at 69c

bid, and 74c asked. The total sales to-day were 215,000 shares. There was a decided improvement in the tone of Wail-street markets yesterday. Although money at intervals ruled at high rates, the fact that the clearing-house banks had announced their intention to take out all the loan certificates necessary to prevent an acute stringency in the money market, did much to restore confidence. The bears renewed their raids on the market at times during the day, but each decline brought in buying orders and sharp advances ensued. The lowest figures touched showed losses varying from 4 to 14 per cent. from the final quotations of Thursday. The announcement of a 2 per cent. quarterly dividend by the General Electric Company, 1% per cent, by the Delaware, Lackawauna & Western and 14 per cent, on the common by the C., C., C. & St. L., taken with reports of gold engagements in London for shipment to this side, and liberal purchases for Boston and London account. started a sort of stampede among the shorts. According to reliable estimates London purchased upwards of 15,000 shares. Manhattan, American Sugar, Lackawanna, Chicago Gas, General Electric and Western Union jumped up, and the remainder of the list improved & to 24 per cent. Later in the day, when money was bid up to 50 per cent., there was a reaction of 4 to 2 per cent., but the demand revived again, and the market left off strong in tone. Railway bonds were weak at the opening.

LUCAL GRAIN AND PRODUCE.

Dull Day in Trade Circles with Prices, as a' Kule, Firm.

As would be expected the last day of June, trade was a little slow yesterday. Wholesale men, however, say that the month, as a whole, has been fairly satisfactory and the unusual steady tone to prices has been benficial to trade. In the grocery line sugars and coffees are easy in tone, but prices have not declined as expected. Provisions are steady and firm with the demand increasing. Coming to produce prices are gauged largely by receipts and the demand for such produce is so great at Chicago that it unfavorably affects this market. Very seldom do fruits and vegetables bring such prices through June as during the last month. Poultry. eggs and butter are all in good request at prices quoted. The bide and leather markets are rather tame.

The local grain market is dull. Receipts have dropped off and the money stringency is causing dealers to buy cautiously and keep near the shore. Track bids yesterday ruled as follows:

TRADING AT CHICAGO.

July Corn Declines 114c and All Provisions Show Losses.

CHICAGO, June 30.—Scared speculators had to pay 60 per cent. interest, to-day, for money to carry wheat. Liquidation was on a stupendous scale. It was the last day before the long-anticipated July delivery, and marked a crisis in the wheat trade. Numbers of unlucky traders had held on to their July wheat, hoping for some bulge or spurt on the bull side to let them out. When the last day arrived and September was at too much of a premium to buy, the only thing left was to throw the July wheat wholesale on the already sick market. This made a sensational turn in the market and resulted in knocking prices to a point never before reached. The low record has been broken many times in the past six weeks, but at no time so abruptly as to-day. There was a disposition to lay the blame of the sharp break in July to a published article saying there was much skin wheat in Chicago houses; that is, wheat which parely graded No. 2. But the real trouble seems to be the difficulty in obtaining funds for carrying purposes. The spread extended to 74c, & remarkable difference which tempted not s few capitalists to carry the wheat as a big investment. Little attention was paid to ordinary influences in the market. Every one was prepared for July delivery. The extraordinary slump of the day exbausted many margins, and struck many stop loss orders, which brought large amounts of wheat in the market. The opening was at about the same as yesterday, to ac lower for July. Prices declined quickly 1 sc, then rallied 1c, ruled weaker, and the closing was 14 @1 se lower than yesterday, although yesterday's figures were the lowest previously known in the history of the Chicago Board of Trade. As far as September wheat was concerned it soon recovered its tone, and for the greater part of the session it was worth as much or a shade more than at the close of the day before. Good rains were again quite general in the spring wheat country, and cablegrams gave the market no support in their quotations of the foreign market. There were, however, numer. ous foreign buying orders on the market and a good deal of wheat was reported 'worked" here to-day. There was a rumor that as much as 2,000,000 bushels for foreign shipment were being negotiated for during the session, but up to the close no more than about 300,000 bushels were definitely placed.

Atlantic shipments were liberal, amounting in wheat and flour to about 575.000 bushels, exclusive of exports from New Orleans. A sale of 300,000 bushels of wheat for shipment at Minneapolis was one of the reassuring items to the bulls. Armour & Co. were at one time liberal takers of July and sellers of September, which likewise had a steadying effect. Counselman & Co. were among the heaviest sellers of July wheat. The trouble in securing freight prevented many of the buying orders for foreign account from being filled, it was

The chief supporters of corn drew out and left the cash end of the deal to care for itself. The consequence was July and September, which had been sailing with a gap of only 20 between them, widdened out to 340 difference. Counselman & Day were the biggest individual sellers of July corn. There was a pervous and unsettled feeling in the market regarding to-morrow's deliveries, but for September the market was firm and closed at 42c compared with 41 sc on the day before. For July 38% c was the latest price compared with 39% o yesterday. There was a good inquiry for export. The feature in the oats pit was the sell-

ing of July and buying of September. The difference decreased from 1c to 1%c. July was the weakest and declined %c from yesterday's close while September held steady. The quietest market on the floor was the privision deal, and prices were well maintained against the adverse influence of heavy long receipts. Carrying charges from July to September were heavier than ever. Fork brought a premium of \$1.2719 for September, lard .80c and ribs .70c. Closing prices for September show the following decline since yesterday: Pork, 7 2c; lard, .02 2c and ribs, .074c.

Freights were slow with moderate offerings of vessel room at le for wheat and corn to Buffalo. Estimated receipts for tomorrow are: Wheat, 100 cars; corn, 870 cars; oats, 225 cars; hoge. 20,000. The leading futures ranged as follows:

The Effect of the Fair. Abram S. Hewitt.

As to the effect the exposition is going to have on the country. I think it will be yast. One can readily see of what immense benefit to the country the Centennial exposition proved. In my judgment, the Chicago exposition will be of far greater benefit. It is a great educational institution, a popular university, whose influence must reach every part of the country. It will be well worth all it has cost and all it may cost, although I feel hopeful that the receipts will I ring Chicago out without any loss. We have lost and are going to lose millions of dollars through the silver business, but through the instrumentality of this exposition we will get it all back again ten times over. I cannot but think also that it will lead those of our people who are astray on financial questions to sounder notions. Surely men cannot look upon this vast aggregate, the product of capital, labor and brains and not realize

the fallacy of the idea of fiat money. Upon Chicago the effect of the exposition must be in the highest degree beneficial. Henceforth the city must be familtarly known the world over. The spectacle, too, of so much which represents the highest refinement and civilization of the world must develop Chicago on the side of

Strawberries and Rheumatism. Pittsburg Chronicle-Telegraph.

Persons who have suffered a great deal from rheumatism for the last month or se will be interested in the statement of a leading physician that he receives nearly as many cases of rhenmatism in strawberry time as he gets during all the rest of the year. Both the acid of the berry and the sugar that is eaten with it, which is converted into acid when eaten in large quantities, are bad for thet matism, which originates in an acid state of the blood. Persons of a rheumatic tendency, or diathesis, often find it impossible to eat strawberries for more then two or three days without experiencing ill effects, and those who have no such tendency are apt to have twinges in their knees and elbows during the strawberry festival season.

DUN & CO.'S WEEKLY REVIEW

Commercial Interests Staggering Under a Load That Can't Be Shaken Off.

Ontlook for Iron and Steel Most Unfavorable Ever Known-Liabilities in Six Months'

Failures Amount to \$168,000,000.

NEW YORK, June 30.-R. G. Dun & Co's. weekly review of trade says: The closing of Indian mints against silver, the fall of silver bullion to 620 in New York and 324d at London on Thursday, the fall in wheat to 6242c at Chicago and 70c at New York, the suspension of operations by miners and smelters of Colorado and some other silver producing States, have made the past week one of unusual interest. Up to the present time domestic trade has not materially changed since last week, though increasingly restricted by monetary uncertainty. Philadelphia remanufacturers unwilling to accept time contracts, but retail trade and collections have improved in most lines. Pittsburg reports increased weakness in iron, and coal mining is dull. At Cincinnati wholesale trade is larger than a year ago, but collections are slow, money close and banks cautious. At Cleveland there is no improvement in iron ore, and lake freights are depressed. At De-

troit business is fair but conservative, and

money close. Chicago reports better accommodations for merchants, and though business is still somewhat restricted, collections are less difficult. The closing of silver mines and smelting works may lessen orders, but it is believed only temporarily. The trade with farming regions is expected to improve with better crop prospects and a larger export demand. Provisions are steady, but wheat is at the lowest price forforty years, though now held by strong parties. The retail trade of the city has been much enlarged by the world's fair. Receipts of products are generally smaller than a year ago, and decrease appears in clearings and sales of real estate and securities. At Milwankee crop reports are encouraging, but in iron mining sections trade is much depressed. Collections are slow and many extensions are asked. St. Paul reports good crop prospects, collections slow and trade quiet. St. Louis notes fairly active wholesale trade, some decrease in collections and money in only moderate demand at 6 and 8 per cent. Business at Kansas City is fair, but grain receipts very light. Omaha reports active trade in groceries and fair in dry goods, and at Denver business is moderate and collections slow. At New Orleans business is very dull, money tight and collections slow, with banks very conservative. The supply of money at Mobile is ample for business, and Atlanta reports trade generally satisfactory, but money tight. Charleston notes larger trade than usual in dry goods, hardware and shoes, with poorer collections. SLIM GROUND FOR HOPES.

Throughout the country, while collections are slow and failures numerous, the condition of legitimate business is regarded as healthy and hopes are entertained that the worst has passed. The hopes are mainly based on the belief that the silver law will be repealed and the certainty of its repeal will encourage foreign investments here. Lower prices of products also tend to increase merchandise exports. Wheat has reached prices regarded as out of the Sheep steady at \$2.75@5. Receipts. 4.750; question a month ago, and yet the supply in sight is very large and returns from the Northwest as to the coming harvest are more favorable. Corn is lower, with very good crop prospects and oats about 20 lower. Hog products have declined 65e for pork per barrel and 15 cents for lard per 100 pounds with increasing receipts of hogs. Cotton, though most stubbornly supported, is an eighth lower, the stock of American here and at seaboard being nearly two and one-helf million bales, though new cotton is but sixty days away. The state of foreign exchange indicates willingness to send money bither for loans or investments, but the Bank of England by changing the rate for gold shows determination to resist exports to this country. Merchandise imports continue heavy while exports thus far in June fall about \$4,000,000 behind the same month last year. The volume of domestic trade shrinks considerably, especially at the West. Clearings in June were about 10 per cent. smaller than last year, the decrease at the West being nearly 20 per cent. Business in iron and steel products is remarkably depressed and experier ced observers pronounce the situation and outlook the most unfavorable ever known, The volume of business is quite-large, but at the lowest price on record. Trade in woolens is much restricted and waiting for future developments, neither manufacturers nor merchants caring to take risks which they can avoid. In boots and shoes a somewhat general suspension of manufacture at the East seems foreshadowed, and while cotton mills are in good shape there is much reluctance to enter into large engagements for the future. > June 30, the failures in the United States number 3,118 as against 2,119 for the second quarter of 1802. For the six months of 1893, the failures number 6,401, against 5,503 during the same period in 1892, showing an increase of 898. The total habilities of all the failures occurring in the first six months of 1893 are \$168,000,000, while for the same period in 1852 they were but \$62,-00.000, showing an increase of \$106,000,000,
